MALONEY'S CATALOG OF
Fruit Trees, Shrubs, Vines and Ornamentals

Spring 1922

MALONEY BROS. & WELLS CO.
DANSVILLE, NEW YORK.
Your Success is Dependent Upon the Reliability of the Grower

Instead of sending you this catalogue we wish we could bring you right to our nurseries in Dansville. We would ask you to sit down at the desk and let us explain just how nursery stock is grown and why it is a real man-sized job to grow it right—why the grower is positively the only man who knows absolutely that he is sending you what you order.

We would show you everything we have—4 large, completely equipped farms, the soil of which is especially suited for nursery stock growing and see how these farms are specially fitted up for producing strong, healthy, vigorous trees and plants which are equipped with a beautiful fibrous root system. You know what a wonderful advantage it is to the future growth and development of the tree to have a fibrous root system for it not only enables the trees and plants to establish themselves quickly, but it also means that you will not have to work around the stock half as much as is necessary to force growth on a poorly rooted tree. Our method of digging by steam to insure the roots being left on the plant instead of in the ground. Digging in this manner is just another evidence that we are always ready to procure the best equipment obtainable. Our enormous packing house where the stock is sorted and shipped—our modern business office where accurate, careful records are kept so mail orders can receive the same care as if the customers were here in person.

You would understand why we always sell people who come to visit us. Simply because they see with their own eyes that we grow scientifically and use every care and business system to insure the delivery to the planter of the finest stock possible and exactly the varieties each orders.

If it’s impossible for you to come to us, please read the opening pages of this catalog carefully and imagine you are here at our desk. We have tried to talk with you on these pages and tell you the things you ought to know about our nurseries.

We have been building up a business here for over 38 years—by selling direct to the planter from our catalogue. Every year our business has grown. That means we must have given our customers the best quality, true-to-name, stock—at the right price.

This year is no exception—38 years of experience, expert care, financial responsibility and personal reputation will be back of the stock which we send you, (it will be absolutely right), and remember the price is based on the cost of the production, plus one profit only.

When planting your orchard make sure that you have selected varieties which are adapted to your soil, climatic, and market conditions.

If there is anything you want to know about nursery stock in general, or about special varieties, just write me and I will be only too glad to answer to the best of my ability.

Yours cordially,

W. J. Maloney
Secretary.
The Fine Art of Growing Stock
By Our Propagator, A. E. Maloney

JUST where to look for values and what to recognize as defects are the problems that confront private buyers of nursery stock every season. Some soils are better adapted than others to the production of good nursery stock, and the process of growing fruit trees for replanting is not a simple one. In the first place there are but few localities in the U. S. where the work can be advantageously done, for nursery stock requires the best possible soil and the land used for this purpose is held at a very high premium around Dansville.

As to the best stock on which trees should be grafted, many nurserymen disagree. We import all our seedlings on which different varieties are budded directly from France because we have found by experience that the elements existing in the U. S. are not at all favorable for raising seedlings with the full measure of success required. Around January 1st, when these seedlings begin to arrive from France, we carefully place them in our root cellars, and throughout the winter see that they are properly trimmed and made ready for planting in the Spring.

We plant them on the upland during the month of April, and all through the Summer months they are carefully cultivated and hoed weekly until early Fall. Budding, which is scientific work and can only be done by experts, is accomplished in the months of July and August. In fact the writer, personally, cuts the scions for budding from the best bearing trees, to insure its growth the Maloney way, thus making certain of our patrons getting true to name trees.

The buds are first inserted two inches above the collar of the seedling after which they are carefully tied with raffia. Not until the following Spring is it possible to cut off the seedling just above the bud, as the root has only the bud to support. But by proper cultivation and careful hand work, it is possible to produce a growth of from 4 to 6 feet the first year. When still another Spring arrives, we head these buds to a height of 30 inches, but it takes skilled labor and very careful handling to produce the correct development of these heads.

All this care and expense would avail us little unless our stock is carefully dug, and so important do we consider the digging that we use steam power for the purpose which is the only system that insures our getting all the roots intact for not only good roots, but all the roots are necessary for the proper thriving of a tree. We trust we have given you enough pointers for you to determine "Where to buy nursery stock."

Yours respectfully,

A. E. MALONEY, Pres.

A. E. Maloney at right personally supervises budding and every detail of propagation
Scientific Culture Plus Constant Supervision Responsible for the Quality of Maloney Trees

Our father, Thomas Maloney, established in 1884 the Nursery business which we now own and manage.

Since we were boys of fourteen, we have worked in the nursery—we have heard nursery problems discussed—we have been educated to carry on the nursery business according to the ideals of our father, who said—"Remember boys, you are morally responsible for every tree you sell. Watch over your stock from budding to shipping, so that you know each tree is true to name—that it is free from disease—that it is up to size and rooted right—that it is exactly what is ordered by the fruit grower."

As our nursery business began to grow, we recognized that our responsibility to the fruit grower was constantly increasing.

To be able to accept this responsibility—we studied to make our nursery culture more and more scientific. We bought more farms so that we could keep the soil healthy—farms around Dansville, suitable for growing nursery stock, are worth big money. Yet one of our big farms is devoted this year exclusively to general farming, to let the soil rest. It means a big loss to us, but it also means better stock. Next year we will buy the best seedlings France can produce and start using this farm again for nursery culture.

One after another our farms get rested so every year we are able to keep the stock we ship up to the standard known to our thousands of customers, as Maloney Quality.

We have not been content to learn only by experience, but have worked and studied on the theory of the nursery business—we have called upon Agricultural Experimental Stations to aid us in making tests—we have taken courses to improve our business methods—as a result, we not only know how to grow nursery stock, but also how to grow it as economically as possible. We know exactly what every tree in a certain block has cost us to produce. We know how much packing and shipping costs.

That's why we never have to ship anything different in size and quality than we quote upon—when we make a price on trees, we are satisfied with our profits on those trees—and because we grow scientifically, we can quote low prices on Maloney Quality trees.

We have learned that the best trees on earth can be dug, packed, and shipped so carelessly that their first year's growth will be slight, if they don't disappoint you entirely—so we have organized for our customer's benefit, what we call "Maloney Personal Service." Mr. A. E. Maloney personally oversees the budding, cultivating, digging, hauling, sorting, packing and shipping of every one of our trees. He says it only costs a little more to do a thing right and it's worth it just in the personal satisfaction he gets out of doing it that way.

Of course we cannot do every bit of the work ourselves because it takes about fifty men to grow and ship the trees our customers need—but here is something to think about—the majority of these men have been with us over fifteen years, and are as interested as we are in keeping up Maloney Quality and seeing that our customers receive Maloney Personal Service.

Read this catalogue of ours over carefully. If you have any questions as to what varieties you need, tell us your soil conditions, and let us give you the advantage of our thirty-eight years of successful tree-growing experience. We have studied to occupy the same position to the fruit grower, as the lawyer to the business man. Feel at liberty to come to us for advice about trees at any time.
What a Good Root System Means to the Planter

ON the root system depends entirely the future growth and development of the tree. In fact a tree is of little or no value unless it is equipped with sufficient roots. It is regrettable indeed that many nurserymen pay so little attention to this most important feature of the nursery business.

Trees with abundance of roots start quicker, make a faster and more vigorous growth and require about one-half the care of those poorly rooted. Good roots aid materially in bringing the trees into fruiting early for they are essential in quick development. We have made a scientific study of the character of the tree and use only the very best French grown branched rooted seedlings on which to propagate and especially prepare our upland for the reception of the stock.

The roots of the seedlings are carefully pruned before they are replanted—this produces a heavy vigorous root growth. The extra care given the seedlings from the first, results in the well branched heavy root systems which are formed the next year in the nursery row, like illustration.

When these roots are produced, they must not be cut off and left in the ground, therefore, digging is of vital importance. We own one of the three steam diggers which are now in operation in the United States. This system of digging is acknowledged by practical nurserymen as being, beyond any question of doubt, the most satisfactory way for taking up trees and insures patrons of being supplied with stock which is equipped with a beautiful fibrous root system. It might be interesting to know that New York State sent for a photograph of our steam digger to use in a new geography to illustrate modern methods in the Nursery Business.
What Careful Packing Means to the Future Growth of Trees and Plants

Not enough people realize the great importance of careful packing. Stock must be so packed that it will arrive at destination retaining full vitality in order to insure successful planting.

Mr. A. E. Maloney personally oversees the packing and shipping of every one of our trees and plants, thereby giving our customers the best possible service.

Each shipment is packed to carry across the United States—this gives a wide margin of safety and assures every shipment of reaching destination in perfect condition.

Shipments Made by Express are put up in bales using flagging to protect the tops and dampened excelsior mixed with moss in, among and around the roots—this is held securely with heavy burlap.

Freight Shipments are put up in carefully built boxes lined with heavy building paper, using plenty of dampened straw, excelsior and moss—this prevents drying out thereby retaining the full vitality of trees and plants.

Parcel Post packages are put up with shingle tow and moss carefully worked in about the roots and wrapped with heavy wrapping paper.

Hence the reason why Maloney trees transplant so satisfactorily.

Ransomville, N. Y.
Nov. 8, 1921.

Dear Sirs,—The 62 Apple trees arrived in A No. 1 condition. They are better looking trees than I expected to get.

Thanking you for your prompt attention to the order, I am

Very truly yours,

WILLIAM E. BUCHNER.

York, Pa., Nov. 7, 1921.

Gentlemen,—Please note that the trees arrived Saturday, Nov. 5, in first class shape, and we are very much pleased with the same, and think they should all grow fine, as they all seem to be very fine and healthy trees.

Thanking you for giving this matter such prompt and careful attention, I am, Very truly,

R. D. No. 4. CHAS. B. GRIM.

Careful Packing together with Scientific Growing and Digging crowd extra Value into Maloney Trees
Why We Can Sell Trees at One-Half Agents’ Prices

These facts will show you why the agent can not compete with the catalogue house. The agent’s one argument is that if you buy from the catalogue house at a lower rate, you will get inferior stock.

The truth of the matter is, it is impossible for him to sell you trees or plants at our prices for he represents some retail house which buys from the grower, who must make a profit. This we will term profit No. 1. The retail house he sells for must have a profit which is profit No. 2. Then the agent who has big traveling expenses must get a price high enough to cover his expenses, as well as his commission, which is profit No. 3. Therefore the tree which we, the growers, sell to you at wholesale plus one small profit is sold by the agent with three profits, consequently the same tree which we sell direct for 85c, the agent must necessarily sell for $2.00 to $2.50.

You can readily see it is not the difference in quality that causes the difference in price, but it is due to his extravagant system as compared with our improved method of selling direct to the consumer, thus eliminating two profits.

Furthermore, when dealing direct with the grower your trees and plants come to you fresh, healthy and vigorous, chucked full of vitality for they are freshly dug and shipped direct to you. Won’t you agree that after all buying direct from the grower, is the common sense, economical way? All we ask is a trial order and we will do the rest.

4103-39 Elston Ave., Chicago, Ill. April 6, 1921.

Gentlemen:—We received the cherry trees this morning in a No. 1 condition. We are pleased to say that they were even better than the samples you sent us, and we are sure that we can do pretty good business with you in the future.

Respectfully,
JOHNSON & CARLSON.

Seneca Falls, N. Y., April 16, 1921.

Dear Sirs:—The trees ordered of you reached me yesterday in fine condition, and were planted immediately so they ought to grow.

I am very much pleased with them. They certainly are fine specimens. It’s a great satisfaction to know where to send and to be sure to get such excellent stock.

Thank you, respectfully,
MISS ETHYL FRYE.

229 Pearl St., Brooklyn, N. Y. April 4, 1921.

Gentlemen:—The trees were received by A. F. Sills, Westport, O. K. Thanks for your “Maloney Personal Service.” You can rest assured that you will get plenty of publicity wherever I travel for your “square deal” way of doing business.

Yours very truly,
CHAS. K. HINNAN.

Woodbury, N. J., May 14, 1921.

Gentlemen:—The trees you sent arrived in fine condition and we are more than pleased. The cherries are wonderful and all starting out leaves now.

I shall do all I can to advertise your trees and fair dealing.

Thanking you again, I remain,

Very truly yours,
WM. P. SINK.

BLOCK OF MALONEY 2 YEAR CHERRY
Nurserymen must grow their own trees in order to be positive of the genuineness of varieties. We have over 400 acres.
Suggestions on Orchard Planting

SQUARE PLAN for Setting an Orchard. Open circle represents permanents, 40 ft. apart and dots fillers; 20 ft. apart. The latter to be removed in twenty years. These are distances adopted by most planters.

Planting and Care of Stock

Care of Stock on Arrival—All stock should be planted immediately on arrival; but if not convenient to do so, open bundle and heel roots in the ground, covering them thoroughly.

Plant When the Soil is Reasonably Dry—In such condition as you would when planting corn or potatoes.

Pruning—Roots are sometimes bruised in digging. For best results it is imperative that you trim about one-fifth of the root, making a nice smooth cut, thus removing all bruised ends. Cut back one-half of the limb growth.

Planting—Dig the holes deep enough so the trees will be set one inch deeper than they were in the nursery row, and wide enough to admit the roots of the tree to spread out in their natural position. Having dug the hole as directed, let one person hold the tree upright and the other shovel in the earth; fill the hole about one-fourth with the richest dirt, pack it solidly, then put in one pail of water, now fill the hole two-thirds with dirt, pack firmly, then fill up the balance of the hole and pack firmly.

Drainage. Your time and money are wasted if you plant on undrained soil. All hollows should be avoided when selecting positions for planting.

Watering newly-Planted Nursery Stock. A good soaking once or twice a week if the ground is dry should be resorted to. A mulch of long manure, grass clippings or straw helps to retain this moisture and should be provided if possible.

Labels. Labels should be removed and some other method adopted for recording varieties. The wires will cut and damage the limbs.

Cultivation—Ten days after the tree has been planted, work around it to keep the soil loose; do this about every two weeks during May, June, July and August.

These planting directions apply to shrubs and roses, as a matter of fact everything except evergreens. When planting evergreens prune the roots only.

Trimming Shrubbery. Newly planted shrubbery should be cut back severely; from one-third to one-half of the top should be removed. If the planting is done in the Fall it is usually best to defer this trimming until early the following spring.

Shrubs that Bloom before the middle of June should be trimmed just after the blooming period to ensure a profusion of bloom the following year. Shrubs like Altheas and Hydrangeas which bloom later should be pruned in the Winter. Fading flowers and forming seed vessels ought, where practicable, to be removed, that the strength which otherwise would go into ripening seeds may be diverted to forming flower buds for the ensuing year. In trimming shrubs avoid stiff unnatural results and cut so the plant will bear long, graceful branches.

Winter Protection. Most of us have some varieties which are a little delicate or which have so recently been transplanted that some Winter protection is necessary. A mulch of manure about one inch deep, spread about such plants after the ground becomes frozen, prevents the alternate freezing and thawing which is disastrous. Leaves are valuable for mulching, especially for the perennial beds; they may be confined by branches of wire netting.

If you use barnyard fertilizer for mulching, allow it to remain until about the 10th of April then work it into the ground for by so doing it will greatly enrich the land, as this is conducive to a healthy, vigorous growth, thus bringing your trees into bearing earlier and your plants, shrubs, vines, etc., will be effective much sooner.
Our Guarantee

We Strive to Avoid Mistakes

But in the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untrueness to name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, productiveness or any other matter.

Maloney Cash Discount, Prepaid Express and Freight Offer

FOR SPRING, 1922

We allow 6% Discount on All Cash Orders received before Apr. 10th--3% after that date

AND

We Prepay Transportation Charges on all cash orders of $7.50 or more received during the entire spring season of 1922 to all points in the following states: Connecticut, Delaware, Illinois, Indiana, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

To all other points we prepay one-half transportation charges.

All orders of $7.50 and up to $35.00 will be delivered by Express prepaid.

Those of $35.00 and up will be delivered by Freight Prepaid.

Our Shipping Season usually opens about the 25th of March and continues into the month of May.

Order Early. As our orders are shipped in the rotation they are received, and as we cannot delay orders received first for orders coming later on, we advise the placing of orders early.

Rates. 50 trees at hundred rate providing there are not less than ten of any one variety.

Terms. We will ship trees and plants C. O. D. providing 25 per cent of the total of your order is sent in cash. If the order goes by express you pay the balance to your express agent upon arrival. If the order goes by freight you pay the balance at your bank, where you will also find Bill of Lading, which you present to your freight agent who will deliver shipment to you.

How to Remit. By Check, Bank Draft, Express Money Order, Post Office Money Order or Registered Letter.

Boxing and Packing Free. We box and pack all shipments without charge.

Plant Maloney Upland Grown Stock
Peach Growing is Today a Great Industry. In all probability more peaches are being planted annually than any other fruit. The comparative ease with which Peach trees may be cultivated, their freedom from disease, the short period before they come into bearing, together with the wonderful demand for the fruit, and the facility with which it may be shipped to markets, make peach growing extremely profitable.

Soil. Peach trees will succeed on any kind of rich soil, but will not thrive on clay, nor damp, low land.
Belle of Georgia.  Very large, white peach with red cheek.  
The flesh is white, firm and of fine flavor.  Tree rapid grower and very productive.  July.  Free.
Carman.  Fruit large, color creamy white or pale yellow with deep blush; flesh tender, fine flavor and quite juicy; very hardy and productive every year.  This is a favorite variety with many growers, as it is one of the most profitable varieties ever introduced.  The fruit stands shipping so well that it always reaches market in prime condition, and its handsome appearance causes it to bring the highest prices.  Early Aug.  Free.
Chair’s Choice.  Has no superior in quality and flavor, and for profit is without a rival; large, yellow, free, rich in color, flesh very firm, ripens after Smock; great bearer.  Oct.

Crawford’s Late.  Fruit of large size; skin yellow, or greenish yellow, with a dull red cheek; flesh yellow; tree vigorous, moderately productive.  Last of Sept.  Free.
Crawford’s Early.  A magnificent large yellow peach, of good quality.  Tree vigorous and very productive.  Its fine size, beauty and productiveness make it one of the most popular sorts; no other variety has been so extensively planted.  First of Sept.  Free.
Champion.  Fruit large, beautiful in appearance; flavor delicious, skin creamy white, with red cheek; valuable for commercial orchards, extreme hardiness and splendid quality make it a favorite.  Late Aug.  Free.
Engle’s Mammoth.  Large, round, suture slight; yellow with red cheek; flesh yellow, stone small, free; sweet, rich, juicy.  Sept.  free.
Early Rivers.  Large, light straw color with delicate pink cheek; flesh juicy and melting.  Early Aug.

Deal Direct the Catalog Way and Maloney Service Will Satisfy You.

Oneida, N. Y., April 7, 1921
Gentlemen:—The trees you shipped me April 2d arrived today.  They are certainly extra fine trees and I am highly pleased with them.
Very truly yours,
H. H. GOSLER.

MALONEY’S PREPAY FREIGHT AND EXPRESS CHARGES.
This Expedites Delivery as it Avoids Delay at Transfer Points.
Elberta. The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety, but also valuable for planting in the garden. Elberta is harder in bud than many varieties, therefore a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow, free stone. Season medium early, following upon Early Crawford. Early Sept. Free.

Fitzgerald. It is one of the hardiest peaches, both in bloom and tree; very prolific, large size. First of Sept. Free.

Greensboro. A valuable variety; color greenish-white, shaded and splashed with dark red, very hardy and not so subject to rot as are most early varieties. Owing to extreme hardiness of both tree and bud we recommend it for sections where other varieties do not succeed. Late July. Free.

Heath Cling. Fruit very large. Skin is creamy white in color having a faint tinge of red on sunny side. It is unequalled by any other cling stone. Middle of Sept. Cling.

Hill’s Chili—Fruit medium size, oblong; skin yellow, shaded with dark red; flesh yellow; very rich and sweet. First of Sept. Free.

Hale (New Yellow). (Freestone). This notable new variety of peach is very large in size. In color it is a deep golden yellow overlaid with bright carmine. The flesh is deep yellow, fine grained with a very delicious flavor. Late Aug. Free.

Niagara. Tree hardy, healthy in leaf and bud and bears abundantly. Fruit large, oval, yellow with brilliant red cheek. The stone parts freely from the flesh. Flavor rich and delicious, far ahead of Elberta in this respect. It is indeed a rival for this famous peach. Season is medium early, coming in just before Elberta, overlapping it one week. Last of Aug. Free.

Salway. Large roundish ovate yellow, with a crimson cheek; flesh deep yellow, red at the pit; sweet, juicy, good. Late. Valued as one of the best late peaches for market. Oct. Free.

How to Plant—For your information cherry roots must not be given much sun or wind exposure—either are just as harmful as a heavy frost. You would not think of leaving them out over night uncovered. It is just exactly as necessary to protect them from sun and wind.

Where to Plant—On any kind of land, other than wet. They will thrive beautifully on a sandy or gravelly soil.

Requires Least Attention of all Fruits, because it has been demonstrated beyond question of doubt that scale cannot live on cherry.
Sweet Cherries

Dikeman. Fruit large, black, firm, of excellent quality, fine keeper and shipper. Early August.

Governor Wood. One of the best cherries; very large, light yellow, marbled with red; juicy, rich, and delicious; tree healthy and a great bearer; hangs well on the trees; vigorous. Last of June.

Lambert. A fine sweet variety originating in Oregon, and one of the largest of all Cherries, dark purple red, turning almost jet black when ripe. Flesh firm, rich, juicy, tree rugged, strong grower and an enormous bearer. The growing of the sweet Cherry is a great industry only fairly well begun. There is an enormous market for the fresh fruit and when canned or preserved the markets of the world are open to the producer. Late July.

Napoleon. Tree medium size, erect with roundish head, fruit borne generally in twos, very large oblong, dark purple; very firm, sweet, tender, and juicy; tree hardy and productive. The fruit is of immense size; excellent for jam and jelly. Good keeper, tender, juicy. Good variety. July.

Schmidt's Biggarreau. The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy with a fine, rich flavor. Fruit grows in clusters. It is an excellent shipper and brings good money on the market. July.

Windsor. A splendid, large, liver-colored Cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, the tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Yellow Spanish. Large, pale yellow with red cheeks; firm juicy and excellent, one of the best light-colored Cherries; vigorous and productive. Last of June.

Black Tartarian. This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Bing. This valuable new black cherry succeeds everywhere. Tree very thrifty and upright grower, very hardy and productive, flesh very solid, flavor of the highest quality, a fine shipping and market variety. It is one of the most delicious sweet cherries. This valuable cherry should be followed by Lambert, which is later in ripening. Both are grand cherries. July.

Centennial. A large, light colored sweet cherry; flesh very firm thus making it one of the most valuable of the sweet varieties for shipping. Resembles Napoleon in appearance, of which it is a seedling, but it is larger and more oblate in form. Tree a handsome grower. Its sweetness is very pronounced, being exceedingly sugary. July.
Sour Cherries

**Baldwin.** Fruit very large, almost round, dark red, slightly sub-acid, the sweetest and richest of the Morello type. Remarkable for earliness, quality, vigor, hardiness and productiveness. June.

**Dyehouse.** A hardy and valuable cherry. The earliest cherry of fine quality. Often bears at two years old, and has the appearance of being covered with a purple cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known. For tarts, pies and especially for canning it has no superiors among cherries. Early June.

**Early Richmond.** This is one of the most valuable and popular cherries and is unsurpassed for cooking purposes. This hardy cherry fruits on young trees soon after planting. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head exceedingly productive. Fruit is medium size, round and dark red. The flesh tender, juicy, and sub-acid. Ripens in June.

**English Morello.** Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. August.

**Louis Phillippe.** Large and beautiful fruit of blackish red, flesh tender, mildly acid, good to best. Mid-July.

**May Duke.** Large red; juicy and rich; an old, excellent variety; vigorous, productive. June 15.

**Montmorency—**This is the best of all the sour varieties of Cherries. There is a greater demand on the market for this Cherry than for any other. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of all sour varieties. No matter how unfavorable the season may be, Montmorency can be depended upon for a full crop. The Montmorency is a good shipper, very attractive looking and always brings good prices. The canning factories are always calling for them and want them by the hundreds of tons. The fruit is good-sized, fine flavored and bright clear red. The flesh is of fine quality and sub-acid. Fruit ripens 10 days after Early Richmond.

**Olivet.** A new Duke of French origin. Unlike most others of this class, it is said to be very early and to ripen over a long period. Fruit very large. June.

**Ostheim.** A hardy Cherry from Russia. It has been tested in the severest winters of Minnesota, and has been found perfectly hardy. Fruit large. July 15th.

**Vladimir** Hardy, strong grower, very productive, sub-acid, of excellent quality, juicy. July 15.

**Wragg.** Much like the English Morello. More productive and excels in size, yield and quality. One of the hardiest Cherries and has produced annual crops at the northern-most limit of Cherry culture. August.

PARCEL POST. First class 3 foot trees sent by parcel post, postage prepaid, for 55 cents each, $5.00 per 10.

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date.

For the convenience of our customers, we have printed in heavy type the names of the best and most profitable varieties.

Apple Trees should be planted on ground such as is needed for corn, potatoes and grain.
SUMMER VARIETIES

Early Harvest. Medium to large size; pale yellow; tender, with a mild, fine flavor. Tree an erect grower and a good bearer; excellent for orchard and garden; one of the first to ripen. Middle to end of Aug.

Golden Sweet. Large, pale yellow, tree a good grower and very productive. August to September.

Red Astrachan. Tree hardy and regular bearer, a very vigorous grower; fruit large, roundish, nearly covered with deep crimson overspread with a thick bloom; juicy, rich and beautiful. This fruit commands the best price of the summer varieties. July and August.

Sweet Bough. Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer. August.

Williams Early Red. Medium sized; dark red, sometimes yellow splashed; flesh is crisp, tender, juicy and sub-acid. Ranks above all but one or two of this class. Fine in Delaware and the South. Use it—it is a money maker where you can ship to markets in hampers without delay. It is ready for market just about the time people are growing hungry for new Apples, and it brings top prices. August.

Yellow Transparent. Medium size; roundish, oblate, slightly conical; skin pale yellow when fully matured; flesh tender, juicy, sprightly, sub-acid; good. August.

AUTUMN VARIETIES

Alexander. Of Russian origin. Large, deep red or crimson; flesh yellowish white, crisp, tender, with pleasant flavor. Tree very hardy. October.

Autumn Strawberry. Medium, streaked, tender, juicy, fine, vigorous and productive. September to October.

Duchess of Oldenburg. Summer. Medium size; red striped; flesh white, juicy and excellent flavored. Trees are natural dwarf growers make fine fillers; require small root and branch space. Crops nearly always large. One of the important varieties for all sections north of Mason and Dixon line. Thrives and yields well of high-grade fruit at all elevations in Pennsylvania, New York, Ohio and other northern states. Trees among the hardiest and one of the few that will stand the climate of Iowa, Minnesota, Montana, and other cold locations. You can depend on Duchess to yield apples you can sell for good prices. Aug. and Sept.

Fall Pippin. Very large, yellow, tender, juicy, and rich. Fine in all localities; tree vigorous. September and October.

Gravenstein. An attractive and excellent quality apple. Fruit large and uniform in size, skin thin, tender greenish yellow overlaid with dark red. September to November.

Maiden’s Blush. Large, flat; pale yellow with red cheek; beautiful; tender and pleasant, but not high flavored. Tree an erect grower, and a good bearer. A valuable market apple. September and October.

Pound Sweet. A very large, round, yellow russet apple, very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. October to November.

Pumpkin Sweet. Very large; yellowish russet, sweet and rich. Valuable. October and November.

Merchants And Farmers National Bank, Resources over $1,000,000
Dansville, N. Y.

To Whom It May Concern:
I take great pleasure in saying that I consider Maloney Bros. & Wells Company entirely reliable, a house of many years standing and with undoubted business integrity and honesty.

I believe any merchandise purchased from them will be found strictly according to contract.

Very truly yours,
JAS. M. EDWARDS, Cashier.
American Blush. (High Quality Red Winter Apple). Here is an apple that is not surpassed the world over for large size, great beauty of color, or for excellent quality. Fruit large, roundish color bright red on yellow skin; flesh yellow with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. November to January.

Baldwin. This is the leading commercial variety in the American markets. It is to apples what Elberta is to peaches and Montmorency is to cherries. One of the best storage apples for export trade. Thousands of barrels of this fruit are exported to England annually. Baldwin is planted extensively and succeeds wonderfully well in all states east of the Mississippi. No variety yields larger crops, bears shipment better or is more attractive in colors, size and shape. It is highly esteemed for an eating and cooking apple. Fruit large, bright red, crisp, juicy and rich. Trees vigorous, upright and productive. For a commercial orchard, it can be relied upon. If ever in doubt what kind of apples to plant, select Baldwin. It should be in every orchard. December to March.

Belleflower. Adapted to the northern and middle states; highly esteemed for its excellent dessert qualities. Oct. to Feb.

Boiken. Annual bearer, vigorous grower. Fair size, hardy; bears young, very attractive and regarded as one of the most valuable apples of recent introductions. November to March.

Ben Davis. is hardy and attractive, succeeds wherever apples are grown. There is no apple that has more favors on account of its hardiness, productiveness, beauty and endurance in shipping. It is excellent for cooking. There are better apples but where Ben Davis succeeds one can always be sure of success, owing to its regular and heavy bearing qualities. The fruit is thick-skinned, does not knuckle, dresses easily, and presents a good appearance in the package after being handled and shipped in the ordinary way. Nov. to Apr.

Delicious. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh firm, crisp, melting, juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. Tree one of the hardiest. November to April.

Fameuse. (Snow Apple). Medium size; deep crimson; flesh snowy white, melting and delicious, one of the finest dessert fruits and valuable for market; a good baking apple. October to December.

Gano. An improved Ben Davis, adding to the good qualities of that variety a much handsomer fruit of deep, dark red, that brings a ready sale in market. Dec. to Mar.

Gilliflower. (Black.) An old dessert apple; tree a good vigorous grower and a reliable cropper. October to February.

Grimes’ Golden. Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Tree is very hardy and productive, and one of the best fillers, as it comes into bearing very early. Grimes Golden is one of our few best sorts. December to April.

Hubbardston Nonesuch. Large, striped yellow and red; flesh yellow, juicy and tender, with an agreeable flavor of acidity and sweetness; of the finest quality and very valuable; strong grower; bears well every year; comes into bearing early. You will find it a splendid orchard tree for New York and Pennsylvania. Nov. to Mar.
Jacob's Sweet. Large, yellow with red cheek. Excellent quality and good keeper. December to January.

Jonathan. A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicily, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. Will keep well without special care and also stand much handling. November to January.

King. (King of Tompkins Co.) When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is of the largest size and possessed of the greatest beauty. The market is never fully supplied with this variety, and, as its size and beauty make it in great demand. Tree a vigorous grower, good bearer and hardy. November to January.

Mammoth Black Twig. Resembles a large Winesap. Dark red. A very profitable variety to plant for market. It is productive and a long bearer. If a late winter apple is desired you will make no mistake in adding it to your list. December to April.

McIntosh Red. An exceedingly valuable, hardy, attractive apple; good size; nearly covered with red. Flesh white, fine, very tender, juicy and refreshing. A red hardy variety, a good annual bearer—comes into fruiting early, yielding large crops. Mr. Maloney recommends this variety to our patrons as one of the best used as a filler. The hardiness of both tree and fruit and its great early bearing qualities, coupled with its elegant color and splendid flavor, makes it a most valuable apple. Do not overlook McIntosh when selecting varieties for commercial orchard planting; has no superior as an early winter apple. October to January.

Newtown Pippin. Medium to large; yellow delicious flavor; a long keeper. Known throughout Virginia as Albemarie Pippin. November to May.

Northwestern Greening. A round, large attractive, greenish yellow apple; flesh fine grained, juicy, firm, good quality. October to April.

Northern Spy. A hardy, large, red, winter apple. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree very healthy, strong grower, rugged. Blossoms very late, escaping frosts. Its large size, handsome appearance and superfine quality give it first rank for fancy trade, and when well grown and properly packed, it sells for higher prices than any other winter apple. It retains its crispness and high flavor well to the end of its season. December to March.

Rhode Island Greening. This apple has a recognized standing, both in domestic and foreign markets, and sells readily for good prices. It is regarded as the very best cooking apple grown and also excellent for dessert use. Size large. Flesh yellowish, firm, fine grained, crisp, tender, juicy, sprightly sub-acid, very good. Skin grass-green to yellow, sometimes with brownish-red blue. Tree large, strong, vigorous, wide spreading. Ripens in December, keeps until April.

Rome Beauty. Large, round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation due to real merit. Good grower; blooms late; bears heavily every year; is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York, West Virginia and Maryland, will make more money than some of the sorts which are now a large part of the total number of trees in commercial orchards. Reliability, due to being frost-proof, strong-growing and sure-bearing, make it a favorite with the grower.

Roxbury Russet. Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a good bearer. Keeps until June. Its great popularity is its productiveness and long keeping. December to May.

Smokehouse. Fruit medium to large, uniform size and shape. Color yellow or greenish mottled with rather dark red, sometimes deepening to a solid bright red in Mar.

Sпитzenburg (Esopus). Unequaled for its high rich flavor, color deep red; flesh yellow, crisp, rich and excellent. Dec. to Mar.

Stayman's Winesap. Medium to large, attractive; green and yellow, almost hidden by dark red stripes; flesh yellow, not in the least mealy; plenty of juice; quality the finest. Tree a quick and large grower, bears young, often producing a barrel to a tree when five years old. Bears every year, crops uniformly heavy. You cannot find a better sort, either for bearing habit, size of fruit, looks or quality. Except at the higher elevations, is almost always our most desirable apple for east of the Mississippi. Do not hesitate to plant Stayman's Winesap. December to April.

Sutton Beauty. Tree vigorous, upright, spreading, fruit uniform in size and shape, fine grained, crisp, tender, very good. Color bright red striped with carmine. Nov. to Mar.

Telman Sweet. Medium size; light yellow; flesh white, firm, rich, and very sweet. Excellent for winter baking. This is the old favorite, highly prized for baking, etc. Productive, an early bearer, long keeper. Nov. to Apr.

Wagener. (Red Winter Apple) Wagener is one of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. No orchardist's list of varieties can be complete without this beautiful and superior flavored apple. Of medium to large size; flesh firm, sub-acid and fine quality. Dec. to May.

Wealthy. This is one of the best red early winter apples. Owing to its early bearing qualities it is planted largely as a filler. Its extreme hardiness makes it a valuable variety for the Eastern States and is considered to be one of the best all around early winter apples to grow. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This variety is particularly valuable for cold climates because the tree is very hardy. Wealthy is being planted largely for commercial purposes as a filler in many sections. Oct. to Jan.

Winesap. Large, roundish, oblong; deep red with a few streaks and a little yellow ground color appearing on the shady side: flesh yellow, firm, crisp, with a rich, high flavor; quality very good, and highly esteemed in the South and Southwest. Dec. to May.

Winter Banana. Fruit large size, perfect in form; golden yellow, and beautifully shaded and marbled with bright, crimson red; flesh lemon-yellow fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. A good keeper. Tree remarkably strong grower, and on account of its great hardiness, will thrive in any climate. Its early bearing is something simply wonderful, generally producing a fine crop the second year. A valuable market variety. Very popular especially in New York and Pennsylvania. November to January.

Wolf River. Fruit is very large, some specimens weighing 27 ounces; flattened, conical, highly colored. An excellent cooking apple. Sept. to Dec.

York Imperial. A fine, hardy, large, red, winter apple; succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. Splendid variety for Pennsylvania. Nov. to Feb.

BEST HARDY CRAB APPLES

For Prices see Page 16

General Grant. Large, round, yellow, covered with stripes of red, and when exposed to the sun, turning quite dark; flesh white, fine grained. Sept.

Hyslop. Fruit large, deep crimson; produced in clusters; flesh yellow, sub-acid; and popular on account of its large size, beauty and hardiness. Oct.

Transcendent. This is probably one of the best of all crab apples, is popular over the entire country. It is perfectly hardy everywhere and an immense bearer, yielding large crops every year. It is also a rapid grower and often bears fruit three years after planting. The fruit of this crab is held in great esteem by housewives for making jelly. Fruit, bright yellow, striped with red. Sept. to Oct.

Sandwich Mass., Nov. 11, 1921.

Gentlemen:—The shrubs and trees ordered from you came in due season and in excellent condition. I am greatly pleased with my first purchase of you and shall continue to let you serve me, as I add trees and shrubs to my place.

Very sincerely yours,

A. L. SEARS.
If Undecided About Planting, Read the Following Orchard Report
By the Government

These figures were copied from a bulletin issued by the Department of Commerce, Bureau of Census, Washington, D. C., dated June 27, 1921.

APPLES:
Trees of bearing age—
1920 ............................. 115,265,029
1910 ............................. 151,322,840
Decrease ........................ 36,057,811
Per cent of decrease ............ 23.8

Trees not of bearing age—
1920 ............................. 36,171,604
1910 ............................. 65,791,848
Decrease ........................ 29,620,244
Per cent of decrease ............ 45.0

PEACH:
Trees of bearing age—
1920 ............................. 65,654,921
1910 ............................. 94,506,657
Decrease ........................ 28,851,736
Per cent of decrease ............ 30.5

Trees not of bearing age—
1920 ............................. 21,623,657
1910 ............................. 42,266,243
Decrease ........................ 20,642,586
Per cent of decrease ............ 48.8

The above table is inserted in our Catalogue for the benefit of our customers for we want you to be informed as to orchard conditions existing in the United States. When you realize that there are 65,000,-000 less Apple trees and 49,000,000 less Peach trees in the orchards of the United States today than ten years ago, you will want to increase your planting.

An investment in fruit trees now is bound to prove extremely profitable. You will find our prices on Apple and Peach reduced about 50 per cent; in all probability as low as they will be anytime in the future.

It is only natural to assume when this report becomes generally known that there will be a big demand for Apple and Peach trees. You know there are only a certain number of these trees available for spring shipment. Unlike a manufactured production, it is impossible to produce additional stock until next Fall. Avoid disappointment and order your Apples and Peach trees now.

PARCEL POST. First class 3 ft. Pear Trees sent by parcel post, postage prepaid, for 70 cents each, $6.50 per 10.

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

For the convenience of our customers, we have printed in heavy type the names of the best and most profitable varieties.

The planting of Pears is on the increase, so much so that it has been difficult for us to supply the demand. This is especially true of Bartlett, Clapp's, Kieffer and Seckel which are the leaders and in the order as named.

Soil. Pears will succeed best in a clayey soil, although any good heavy soil will do, but avoid planting on sandy loam.

Beurre Bosc. A large and beautiful russet pear, very distinct with a long neck; melting or nearly so, highly flavored and delicious, bears well, ripens in October.

Clapp's Favorite. A superb large, long yellow Pear, richly flushed, with russet-red next the sun. The flesh is fine grained, juicy, melting and buttery. A cross between Bartlett and Flemish Beauty; earlier than Bartlett and resembling Flemish Beauty in growth. It is as hardy as the Flemish Beauty; a fine grower and extremely productive. Early August.

Duchess D'Angouleme. A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

Flemish Beauty. Considered one of the hardiest and best for the northwest in which location it bear great crops of perfect fruit. Sept. and Oct.

Howell. Large, yellow, with red cheek; early bearer and productive. September and October.

Koonce. A very popular early variety. Fruit large, yellow, one-half nearly covered with red. Does not rot at the core. Tree vigorous, hardy and upright grower. Very productive and a good shipper. July.

Bartlett. Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored, a most delicious fruit; tree bears early and abundantly. We have sold many large orchards of this variety. The fruit ripens just at a time when there is but little competition; in fact, there is no pear ripening at the same time that is in the Bartlett class. It might surprise you to know—nevertheless it is a fact—that there are more of this variety planted than all other kinds of pears combined. That speaks for itself, does it not? You will never make a mistake when planting Bartlett. Sept.

Beurre D'Anjou. This is one of the best known, most popular and profitable late pear. The tree is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thoroughly ripe. They are very juicy and luscious and of the best quality. For late fall and very early winter use, we have no better variety. Many claim that this is the greatest of late autumn pears. It keeps until January with special care. It is beautiful in shape and color. Season October and November.
Kieffer. Large, rich golden yellow, sometimes tinted red on the sun-exposed side; fair quality, excellent for canning. It has become a profitable market variety on account of its good shipping and keeping qualities. To properly ripen should remain on the trees until leaves begin to fall, then gather carefully and allow to ripen in a cool dark cellar, or other place of even temperature. Tree a most vigorous grower, an early bearer, one of the most resistant to blight, very prolific, and widely planted throughout the country.

Lawrence. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter Pear. The tree is hardy, healthy and productive, bearing large crops annually. Nov. and Dec.

Sheldon. A large, round, russet and red pear of very fine quality, melting, rich and delicious. Tree vigorous, erect and handsome, bears well and should be more largely planted. Oct.

Seckel. A beautiful and delicious little Pear that is the standard of excellence in its class. One of the richest and highest flavored Pears known, always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. Sept. and Oct.

Vermont Beauty. Yellow, bright, carmine cheek. The tree originated in Northern Vermont and is very hardy and thrifty. October and November. Wilder. One of the very earliest pears, attractively colored and of excellent quality. Of medium to large size, irregular, bell-shaped, but with smooth surface; pale yellow with shadings of russet-red. Early August.

Winter Nelis Winter Nelis is held in very high esteem by experienced pear orchardists in general. It is without exception the finest winter variety yet produced. The tree is very hardy and a very heavy Cropper. Fruit is of medium size and roundish in appearance, yellow in color, covered with russet. The flesh is yellow, sweet and fine grained. Unexcelled for quality when fully ripe. Owing to the fine keeping qualities of this pear it is unexcelled as a good shipper. December.
Our Hardy Upland Grown Trees and Plants Satisfy—Try Them

Lockport, N. Y., April 19, 1921
Maloney Bros. & Wells Co.,
Dansville, N. Y.
Dear Sirs:—
Received the trees the 18th O. K. and think they are fine.

L. H. Meeder

Moultrie, Ohio, April 27, 1921
Dear Sirs:—
Your fruit trees at hand and in fine shape. Have them all planted and don't think I will lose one of them. My neighbors are also well pleased with their trees.
Yours truly,
Ira Schweisberger

Belvidere, N. J., April 15, 1921
Maloney Bros. & Wells Co.,
Dansville, N. Y.
Dear Sirs:—
I received the trees you sent me and thank you very much for sending such nice trees. Everyone is a beauty and I certainly appreciate your kindness and wish to express my thanks for the careful way in which they were packed. I certainly am proud of them.
Very truly yours,
Mrs. Harry Valentine

Fifty at hundred rate, providing not less than ten of any one variety.

PARCEL POST. First class 3 foot trees sent by parcel post, postage prepaid, for 70 cents each, $6.50 per 10.

6 Per Cent Discount on all cash orders received before April 10th. 3 per cent after that date.

Plums are hardy and grow vigorously in nearly all sections, succeeding on any soil that grows good corn or potatoes. Plum trees are planted about as far apart as peaches; that is, from 15 to 18 feet apart each way. Many growers prefer to plant them closer one way than the other, and eventually to stop cultivation in one direction. If this system is used they may be placed 18 to 20 feet apart one way, and from 10 to 12 feet the other way. The trees are pruned the same way that apple trees are, when planted.

**Bradshaw.** A very large and fine early plum, dark violet red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. Middle of Aug.

**Fellemburg Prune.** A fine prune, oval; purple; flesh juicy and delicious; parts from the stone; fine for drying; tree very productive. Early September.

**German Prune.** Medium; oval; purple or blue; juicy, rich, fine. Tree vigorous and very productive. One of the best. Sells for higher prices in market on account of high quality. A leading favorite. There is no easier grown fruit that gives greater or more certain profit than the German Prune. Early September.

**Grand Duke.** One of the best late plums for market, as large as Bradshaw, of same color, entirely free from rots. Last of September.

**Guell.** This is one of the newer varieties originating in New York state. The color is a dark purple. The flesh is firm, sub-acid and agreeable. Size large. September.

**Imperial Gage.** Rather large; oval; greenish; flesh juicy rich and delicious, parts from the stone. Tree a vigorous grower; very productive and one of the best of plums. Middle of August.

**Lombard.** It is a handsome reddish plum, the flesh yellow, juicy and pleasant. It is an excellent variety and can be relied on for a crop when other varieties fail. August.

**Moore’s Arctic.** Fruit grown in clusters. Color dark blue or nearly black when fully ripe. Dr. Hoskins says this is the hardiest plum he has tested. September.

**Maloney Prune.** We are offering it this year at same prices as other varieties. Season extending from September 15th until freezing weather. Color or dark blue; flesh yellow and delicious; freestone; heavy annual bearer. It certainly is a marvel—just what the orchard man has been looking for.

**Niagara.** Red, large size, makes an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit. Tree is an upright grower, vigorous and healthy. Middle of August.

**Reine Claude.** (Bavay’s Green Gage)—Roundish, oval, greenish, marked with red in the sun; a great favorite. September.
Shipper's Pride. Large, nearly round; dark purple; quite juicy, sweet; splendid shipper and marketer; moderate grower; productive. Originated in northwestern New York. September.

Shropshire Damson. One of the favorite Damsons. Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

Thanksgiving Prune. Very productive, good quality. It will keep for weeks after picking. It is extremely hardy, as a matter of fact, will succeed in any state east of the Rockies; absolute proof against severe winters. October.

York State Prune. One of the largest, best in quality and most productive of all prunes; large size, color dark blue, covered with purple black, delicious; originated in Dansville, N. Y.; a vigorous grower and hardy. Is being planted extensively and is considered the best for commercial purposes. Last of Aug.

**JAPAN PLUMS**

**Abundance.** One of the best Japan Plums. The tree a rapid grower, healthy, comes into bearing remarkably young and yields abundantly. Fruit of medium size, large when thinned; amber, with markings of red; juicy, sweet, of good quality when well ripened. May be picked when it begins to color; will keep a long time. August.

**Burbank.** is decidedly the best of Japan varieties unsurpassed for beauty and productiveness, as well as a very hardy tree with foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval, with a reddish purple skin; flesh yellow, juicy and good. A good one. August.

**Japan Plums—(Continued.)**

Climax. Tree extremely vigorous, upright, with strong branches and very large leaves. Productive as Burbank, about as large and usually two or three weeks earlier. July.

Red June. The great early market Plum. Medium to large; deep vermillion red, with beautiful bloom; very showy; flesh light lemon-yellow, firm, slightly sub-acid, delightful. It is the best in quality of any of the early Japanese plums, free from rot. Ripens in early Aug.

Wickson. This, largest of the Japan Plums is superb in every way. The color is bright cherry-red, covered with a light bloom; the pit is small for so large a fruit, the flesh is thick, sweet, tender and rather dry, indicating good keeping and shipping qualities. The fruit sells almost on sight. September.

**Champion.** A large, late-ripening sort, that produces good and constant crops. One of the best for sections not subject to early frosts. Last of Oct.

**Orange.** Buds secured from Fred Grover's orchard, Pultneyville, N. Y. Every one is acquainted with the Orange Quince, a good old variety that never disappoints the planter; good for home use and for market. Its large golden yellow fruit of fine quality is to be seen in more or less quantities in nearly every garden or orchard every season, as it rarely fails to produce a crop. Ripens in October.

**Meech's Prolific.** Fruit is large, orange yellow, of great beauty and delightful fragrance. Tree a vigorous grower and immensely productive. Ripens between the Orange and Champion. Last of October.

**Rea's Mammoth.** Large, rich, golden yellow. Sure to ripen even in Northern latitude. Very hardy and productive. October.

Beautiful and delicious fruit. In quality and appearance is between plum and peach, combining qualities of both. Ripening early, together with its delightful flavor makes it one of the most valuable fruits. Tree hardy as the peach. Requires about the same cultivation as the peach or plum. It ships well and commands a good price in any market. For drying and canning, it has no superior. The Russian Varieties are quite distinct from the other European sorts; much hardier, earlier bearers and productive.

**Alexander.** Very hardy and immense bearer; fruit large; yellow, flecked with red; very beautiful, sweet and delicious. July.

**Alexis.** Very hardy and abundant bearer; yellow with red cheek; large to very large; slightly acid, rich and luscious. July.

**Moorpark.** One of the largest. Orange with red cheek; firm, juicy, with a rich flavor; very productive. August.

WHEN BUYING NURSERY STOCK make sure that the firm from whom you buy has been established long enough for their varieties to be fully tested in the orchard.

Buying trees in a sense is like buying diamonds for it is impossible on arrival of the stock to tell whether you have or have not what you ordered; only an expert can name varieties. It is such a mistake to purchase cheap trees—they are dear at any price.

The most essential and important matter to consider is, “Am I going to get varieties true to name?” Next, “Am I going to receive healthy, vigorous trees?”

How are you going to be sure? By buying from a firm who has been serving people all over the United States for thirty-eight years to their entire satisfaction; who has been advertising in such papers as the Rural New Yorker, Farm Journal, Country Gentlemen, etc., all down through these years, which papers will not carry your advertisements unless you are giving their subscribers a square deal.

Furthermore when you consider the amount of time and money spent in developing your orchard, you cannot afford to take any chances on cheap trees.

---

Maloney’s Prepay Transportation Charges

We prepay transportation charges on all cash orders of $7.50 or more received during the entire spring season of 1922 to all points in the following states: Connecticut, Delaware, Illinois, Indiana, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

All orders of $7.50 and up to $35.00 will be delivered by Express, prepaid. Those of $35.00 and up will be delivered by Freight, prepaid.

WHEN BUYING FROM MALONEY’S YOU KNOW JUST WHAT YOUR TREES WILL COST YOU DELIVERED. (See Page 9.)
Dwarf Fruit Trees

Dwarf fruit trees bear larger, better fruit, bear several years earlier, and produce more returns for a given space than standard trees. This is all true and there are even more important points. The low, broad heads are within reach, so that apples or pears can be easily picked. You can plant dwarf trees in your garden and still grow strawberries and most vegetables. With dwarfs some varieties will bear the first year, all will the second and bear a full crop the fourth year.

Dwarf Apple trees are budded on Paradise or Doucin stock, and Dwarf Pear trees are budded on Quince stock. They will succeed in many places where standard trees fail. In a word, they are the kind of Dwarf trees that will put their strength into fruit instead of wood.

Maloney Extra Large Garden Trees

For Your Back Yard

By this we mean trees which have been especially selected and scientifically treated and will come into fruiting early. We guarantee your success provided you follow the simple directions for planting given below.

The value of these trees lies in the fact that they are what you might term "the cream of our nursery." We have cared for them until they have developed into just the kind of trees for your back-yard or small home orchard. They certainly are the trees that will pay you the best to plant.

A great many people make the very serious mistake of selecting small trees for their garden planting, when a few extra cents invested now will purchase trees which will fruit much earlier.

These trees are equipped with a beautiful root system which enables them to establish themselves quickly. Before planting be careful to have your soil loose and mellow.

Just read the planting directions on this page and see how easy it will be for you to set your EXTRA LARGE GARDEN TREES yourself.

Maloney Extra Large Garden Trees Fruit Early

Planting Instructions

Cut off about six inches of the limb growth, prune off bruised ends of roots, if any, make a smooth cut, dig hole deep enough so that the tree will be buried to the same depth as when standing in the nursery row, or up to the collar—soak roots in water one-half hour, place trees in hole, fill in one-fourth, tread well; another one-fourth, tread well; the third one-fourth, tread well; then finish filling and tread firmly so that when the tree is set it would require a strong man to pull it out.

MALONEY EXTRA LARGE 7-8 Ft.
FRUIT TREE COLLECTION

5 Trees, value $5.75 for $4.50
1 Red Astrachan Apple
1 Bartlett Pear
1 Elberta Peach
1 York State Prune

Cuthbert. This is a valuable variety well tested throughout the country. It has given good results both from home use and market. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and always command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries.

Loudon. Very hardy, yields 200 bushes per acre, bears best on strong clayey loam, but succeeds well on sand.

Marlboro. A very profitable, early market variety with large, light crimson fruits, of good size and flavor. The crop covers a period of four or five weeks in ripening.

St. Regis. (Everbearing) This promises to be the most valuable addition to the list of Red Raspberries. The only variety known that gives a crop of fruit the same year they are planted, and two crops a year thereafter. Plants that are set early in the spring will give a small crop of fruit the fall following, and the next spring a big crop, equaling that of any Red Raspberry known. In size, quantity and quality, to say nothing of its fall-bearing qualities, it is ahead of anything we know of. About the middle of August it commences to set fruit on the young canes, and bears continuously from then until frost. The berries are large, beautiful and attractive. If you have failed with every other variety of Raspberry, either North or South, plant St. Regis and succeed.

Conrath, Early Black. In Conrath we have united vigor, hardiness, large size and productivity; qualities that will give it a foremost rank.

Cumberland New Black. This new berry is a very valuable acquisition. With its greatly superior size it combines the equally valuable characteristics of great firmness, splendid quality and wonderful productivity. Fruit very large, firm. Mid-season.

Gregg Black. Of good size; fine quality, very productive and hardy. It takes the same position among black caps as Cuthbert among the red sorts. No one can afford to be without it. The standard black cap by which others are judged.

Kansas Black. This variety is a strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early. Berries size of Gregg, of better color; jet black and almost free from bloom; firm, of best quality, presents a handsome appearance, and brings highest price in market. The average yield of an acre of Kansas in dried raspberries is 500 pounds. The average price, year by year, is twenty cents per pound.

Plum Farmer Black. This very large black raspberry has been thoroughly tested in western New York where it is a great favorite for market or home use. It is covered with a grayish bloom, like the bloom on a grape, which makes it very attractive in appearance. It ripens very early and quickly. The fruit is enormously large.

PURPLE RASPBERRIES

Columbian Purple. A strong grower, unexcelled for productivity and desirable for canning. Fruit very large, purplish color, rather soft; rich, sprightly flavor.

Wholesale price: 25 for $1.50, 100 for $5.00, 1000 for $30.00.

Central Valley, N. Y., July 31, 1921.

Dear Sirs:—Two years ago I bought from you one hundred Raspberry plants. Last season they bore fairly well for their first year. This year their yield was enormous. We picked over two hundred boxes of huge berries. Had they failed you would certainly have heard from me. I see no reason why I should not tell you of their wonderful success.

Very truly yours,

W. C. HUNTING.
Blackberries

Wholesale Price of 2 Year Strong Plants Well Selected Varieties

$2.00 for 25  $5.50 per 100  $35.00 per 1000

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

Eldorado. The vines are very hardy and vigorous, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well to-gether; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired.

Mersereau. Remarkably strong grower, upright, producing stout, stocky canes. An enormous producer of extra-size berries, which are brilliant black and retain color; extra quality: sweet, rich and melting, without core. Ripens very early.

Minniewaska. This wonderful, hardy, productive, good blackberry has not been forgotten by us, or our old patrons. Its principal points are hardi-ness, excellent quality, earliness, and con-tinued bearing and productiveness.

Snyder. Extremely hardy, enormously pro-ductive; medium size, no hard, sour core; sweet and juicy. Ripens early.

Blowers. Claimed to be the hardiest, most productive, of finest quality and to bring the highest market price.

PARCEL POST. Raspberries and Blackberries can be sent by parcel post, postage prepaid, for two cents per bush extra.

Gooseberries

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit.

Downing. Largest and best of all native American varieties. This valuable variety originated with Charles Downing, greatest of all pomologists. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. Downing is free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Enormously productive.

Wholesale Price. 2 year bushes, 45 cents each, $1.00 per 10, $35.00 per 100.

Josselyn. Marvelously productive and bears second, if not the first year planted. The fruit is of large size, color dark red. When making out your order, do not fail to in-clude some of this variety, as it has been thoroughly tested in nearly every state in the country, and is extremely popular everywhere.

Wholesale Price. 2 year bushes, 45 cents each, $1.00 per 10, $35.00 per 100.

Red Jacket. An American seedling of large size, smooth, prolific and hardy, of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the most free from mildew, both in leaf and fruit, of them all. A wonderful cropper.

Wholesale Price. 2 year bushes, 45 cents each, $4.00 per 10, $35.00 per 100.

PARCEL POST. Gooseberries can be sent by parcel post, postage prepaid, for 3 cents per bush extra.

States into which Gooseberries can be Shipped: Connecticut, Illinois, Indiana, Massachusetts, Michigan, New Jersey, New York, Ohio, Pennsylvania.
Strawberries

Wholesale Price of all Varieties

Express: $1.00 for 25, $1.75 per 100, $10.00 per 1000. Mailed, Postpaid: $1.15 for 25, $2.00 for 100.

Corsican. A great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder and producer; fourth, and the most important of all, the foliage is exceedingly vigorous and leathery, resisting fungus, drought, weeds, and even neglect of cultivation.

Gibson (Per.) Gibson is fast becoming the leading commercial variety in the U. S. It grows and succeeds in every soil and climate, which cannot be said of many varieties. If restricted to one variety, Gibson is the berry we would choose.

Senator Dunlap. (Per.) Season early to medium; popular market sort. It withstands all conditions of weather beyond the average. Very productive; dark red all through.

William Belt. (Per.) A handsome variety that is giving remarkable satisfaction as a large productive berry for market or home use.

FALL BEARING VARIETIES

Americus (Per.) Productive

These varieties will fruit from early July until cold weather.

Wholesale Price

Mailed Postpaid: 25 for $1.25, 100 for $3.50
Express: 50 for $2.00, 100 for $3.25.

Garden Roots

PARCEL POST. Garden Roots can be sent by parcel post, postage prepaid, for one cent each extra.

RHUBARB or PIE PLANT

Linnaeus. Large, early, tender and fine. The very best of all.
15 cents each, $1.25 per 10, $10.00 per 100.

ASPARAGUS

Price of 2 yr. Strong Plants:
$1.00 for 25, $2.50 per 100, $13.50 per 1000.

To plant, see that the ground is well drained. Work it up fine and deep, make it very rich with well-rotted manure. Locate the plants eight inches apart in rows three feet apart, spread out the roots in a trench made deep enough to permit the crowns to be covered with three or four inches of mellow earth.

Palmetto Asparagus. A very early variety, even, regular size and of excellent quality. It has been tested both north and south and has proven entirely satisfactory.

Conover's Colossal Asparagus. Very large, makes rapid growth; planted mostly by market-gardeners; very productive.

HOLT'S MAMMOTH SAGE. Plants of strong growth. Leaves large, borne well above the ground. Of strong flavor and superior quality.
Price of strong 2 year roots, 25 cents each, 10 for $2.00.

HORSE RADISH. Will stand a great deal of hardship and exist in soil year after year. Plant in deep, rich, cool soil.
60c per 10, $5.00 per 100.

Every city and country garden should have a dozen or more grape vines. They do admirably trained up the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest fruit. Plant about 8 feet apart, by the fence or building. For vineyards, make rows 8 feet apart, 6 to 10 feet in rows.

**Brighton.** Red. Bunch large, well formed; berries above medium to large, round; excellent flavor and quality; one of the earliest in ripening. One of the very best shippers. Vine hardy and vigorous grower.

**Catawba.** Dark red when fully ripe. Bunch large, berries medium to large, skin thick, tough; flesh somewhat pulpy, with rich vinous flavor, of best quality for both table and wine.

**Concord.** Black. Early. Decidedly the most popular Grape in America and deservedly so. Bunch large, shoudered, compact; berries large, covered with a rich bloom, skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulpy, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety. Wholesale price, 40 cents each, $3.50 per 10, $30.00 per 100.

**Campbell’s Early Black.** Strong grower, with large, healthy foliage, productive; its keeping and shipping qualities are equalled by no other early grape. Ripens with Moore’s Early. Bunch and berry very large, glossy black with blue bloom, sweet and juicy, seeds few and small, parts readily from the pulp. Stands at the head of early black grapes for quality.

**Delaware.** Red. Bunches small, compact, shoulder; berries rather small, round, skin thin, light red; flesh very juicy, sweet, spicy and delicious.

**McKinley Early (White).** Strong grower; bunches large, compact and handsome, berries large and oval like Malaga Grapes; green at first, turning to yellow when fully ripe.

**Moore’s Early Black.** Bunch large, berry large round with heavy bloom vine exceedingly hardy. Its earliness makes it desirable for an early market. Its hardiness particularly adapts it to Canada and northern portions of the United States; succeeds admirably in the south.

**Niagara White.** Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe. Skin thin but tough; quality much like Concord.

**Worden.** Black. Bunch large, sometimes shoulder, compact; berries very large, skin thin.

125 Laurel St., East Haven, Conn.
April 8, 1921.

Gentlemen:—I received my currant bushes O. K. on the 11th instant. I am entirely satisfied with the strong, clean stock.

Very truly yours,

FRED HELWIG.

Cherry. Bush vigorous, stocky and compact; cluster rather short, with short stems; fruit averages large; color fine, bright red; berry thin skinned, juicy and fine flavored. One of the most productive of the large Currants.

Diploma. Large, solid and of good quality, very attractive appearance, both clusters and berries being very large. Vigorous grower and the most productive red currant.

Fay. (Fay's Prolific.) Bush vigorous but not quite so strong a grower as Cherry; cluster medium to long, with rather long stems; color darker; and berry averages large; juicy and less acid than Cherry. An excellent commercial variety.

Perfection. In color it is a beautiful bright red, a size larger than the Fay; clusters average longer and the size of berries are maintained to the end of the bunch. It is one of the most productive Currants we have ever known.

Red Cross. A strong growing variety. Cluster long; berry medium to large bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants.

White Grape. Bush vigorous, somewhat spreading, productive; clusters long; berries large to very large, averaging large; of very attractive color, mild flavor and good quality. A good table variety.

Wilder. (President Wilder.) Bush upright, vigorous; clusters above medium length; berries large to very large, averaging large; bright red; excellent, with a mild sub-acid flavor. Ripens early and remains bright and firm until very late. Because of its exceedingly vigorous growth, great productiveness, high quality and remaining good so long after ripening, we recommend this as one of the best red currants, both for table and market.

MORE attention is being paid every year to beautifying the grounds surrounding our homes. The increase of reading matter on this subject has caused us to become keenly alive to the fact that as much thought and attention should be given to the environment of a house as to the house itself, and we realize that a house and its surroundings should be considered as a whole.

Too often is the effect of a good picture spoiled in the framing, and the grounds of a home should be considered as a frame to the picture represented by the house. On the other hand, a poor picture may be wonderfully improved by proper framing, and in the same way a house, inartistic in itself, may be made a thing of beauty by giving extra attention to the laying out and beautifying of its surrounding grounds. The lawn may be considered the canvass upon which the house picture is to be made, and the trees and shrubs, together with the buildings, make up the most important materials to be used in the work, and no satisfactory or beautiful home can be made without them.

In fact, the grounds surrounding a home reflect the individuality and tastes of the owner, and first impressions of people are often gained from the way they plant and keep the grounds surrounding their homes. No country can boast of so many beautiful trees, shrubs, roses, etc., as the United States, and with the addition of the choicest varieties from many other countries now offered by this company, we have the greatest wealth of material for the most elaborate work of home beautification or Landscape Gardening.

Just one word about our hardy upland grown ornamentals. The soil and climatic conditions together with experienced labor enable us to produce stock which gives a very effective appearance first year set, for they are scientifically treated and equipped with a fibrous root system which enables them to establish themselves quickly and make a rapid and continuous growth—sold at cost of production plus one small margin of profit.

Your dollar has twice its purchasing power when dealing direct with us, the growers, for the middleman's commission remains in your pocket.
Ornamental Trees

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

No home grounds are really complete without some shade and ornamental trees. The shade of Maples and the dark covers under Evergreens are never forgotten by people who in childhood played and lived under the trees. A comparison of a home without shade trees about it, to one with, is the best argument we can advance.

Underhill, Vt., Nov. 4, 1921.

Gentlemen:—The trees arrived O. K. last Saturday. They are certainly a fine lot and I thank you for the care you have taken in filling the order. Respectfully yours,

T. S. JACKSON.

Marion, Ohio, Oct. 31, 1921.

Gentlemen:—Stock received today and is set out. I am well pleased with it and wish to thank you for the good selection.

Yours truly,

H. HEITZMAN.

American Elm. A natural spreading and drooping tree of our own American meadows and forests. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world. Wholesale:

Price, 8 to 10 ft., $1.25 each, 10 for $10.00, 6 to 8 ft., $1.00 each, 10 for $8.00.

Maloney's Prepay Transportation Charges

We prepay transportation charges on all cash orders of $7.50 or more received during the entire Spring season of 1922 to all points in the following states: Connecticut, Delaware, Illinois, Indiana, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

All orders of $7.50 and up to $35.00 will be delivered by Express, prepaid. Those of $35.00 and up will be delivered by Freight, prepaid.
ADD A FEW MALONEY HARDY UPLAND INCOMPARABLE SHADE TREES AND SHRUBS TO YOUR ORDER

FOR HAPPY SURROUNDINGS TEND TO CONVERT IDLE MOMENTS INTO YEARS OF PLEASANT MEMORIES

MAPLE, SILVER LEAVED OR SOFT

CUT-LEAVED WEEPING BIRCH

HORSE CHESTNUT, White Flowering
LARGE FLOWERING CATALPA SPECIOSA

Beech, Purple Leaf. The blood-leaved tree possesses all the qualifications of an ordinary beech and, in addition has beautiful red leaves. Will retain its foliage during the winter and will add greatly to the appearance of your lawn.

Wholesale Price of Purple Beech trees, 3 to 4 feet high, $2.00 each.

Catalpa Bungei. (Umbrella Catalpa.) Grafted on stems 6 to 8 feet high, it makes an umbrella shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped. A very desirable ornamental.

Wholesale Price of Trees, 6 to 8 feet, $2.50 each.

Catalpa Speciosa. One of the most rapid growers. Valuable for timber, fence posts, railroad ties, etc., possesses wonderful durability. Large, heart-shaped, downy leaves, and compound panicles of white flowers.

Wholesale Price for first class trees, 6 to 8 feet, 75 cents each, 10 for $7.00.

Cut-Leaved Weeping Birch. This noble tree is not only the most popular of the weeping trees, but it is decidedly the best. Its tall, slender, yet vigorous growth, graceful branches, silvery white bark and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

Wholesale Price of Cut-Leaved Weeping Birch, 6 to 8 feet trees, $2.00 each.

Horse Chestnut, White Flowering. The well-known European species; very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior.

Wholesale Price, 6 to 8 feet, $1.50 each.

Maple, Ash-Leaved. (Box Elder.) A fine, rapid-growing variety, with handsome, light green foliage and spreading head; very hardy; desirable for street planting and succeeds in many sections where other varieties do not thrive.

Wholesale Price, 8 to 10 feet, $1.25 each, 10 for $10.00. 6 to 8 feet, $1.00 each, 10 for $8.00.

Maple, Norway. This is one of the hardest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple.

Wholesale Price 8 to 10 feet, $2.25 each, 10 for $20.00. 6 to 8 feet, $2.00 each, 10 for $17.50.
ORNAMENTAL TREES—Continued

Maple, Silver-Leaved or Soft. Foliage bright green above and silvery underneath. An exceedingly rapid grower. Makes a large tree. A very satisfactory tree to plant in large quantities.
Wholesale Price of Silver-Leaved Maple, 8 to 10 feet, $1.00 each, 10 for $9.00; 6 to 8 feet, 75 cents each, 10 for $6.50.

Maple, Sugar or Rock. This native tree of ours is a universal favorite for street planting, and desirable everywhere. It is considered a slow grower, but is long-lived.
Wholesale Price, 8 to 10 feet, $1.50 each, 10 for $12.50; 6 to 8 feet $1.25 each, 10 for $10.00.

Maple, Wier’s Cut-Leaved. One of the most remarkable and beautiful trees, with cut or dissected foliage. Its growth is rapid, shoots slender and drooping, as graceful as cut-leaved birch.
Wholesale Price, 8 to 10 feet, $1.50 each, 10 for $12.50; 6 to 8 feet, $1.25 each, 10 for $10.00.

Mulberry Downing. This tree is not alone valuable for the large refreshing berries it bears, but is very handsome as a lawn or street tree. This should be in every yard or garden.
Wholesale Price, 5 to 6 feet, $1.00 each, $7.50 per 10.

Mulberry Russian. Very hardy, vigorous grower, very productive, fruit black and of medium size.
Wholesale Price, 5 to 7 feet, $1.00 each, 10 for $7.50.

Mulberry, Tea’s Weeping. The most graceful and hardy weeping tree in existence. Forms a perfect shaped head, with long, slender, willowy branches, drooping to the ground.
Wholesale Price, 5 feet, $2.50 each.

Bechtel’s Crab. When in bloom appears to be covered with delicate pink, perfectly double small roses of delicious fragrance.
Wholesale Price for first class trees, 4-5 ft. 75c each.

Poplar, Carolina. This tree takes front rank among the best of the poplars. It is one of the most rapid growers among shade trees, frequently growing eight feet during one season and thus making fine shade in two or three years. It is very desirable when planted at the roadside, in parks or along rivers and streams. It has an advantage over other shade trees because it will grow in any kind of soil.
Wholesale Bargain Prices for Carolina Poplar trees 10 to 12 feet high, 75 cents each, 10 for $6.00, 100 for $40.00, 8 to 10 feet high, 65 cents each, 10 for $5.00, 100 for $30.00, 6 to 8 feet high, 55 cents each, 10 for $4.00, 100 for $20.00.

Poplar, Lombardy. A well known variety from its tall spire-like form. Where it is desired to mark a boundary line, or where there is an entrance to a driveway these trees are very effective. We have some beautiful specimens and can recommend them highly. They transplant safely, grow quickly and for many purposes are attractive and desirable.
Wholesale Price, 8 to 10 feet, 85 cents each, $7.50 per 10, $5.00 per 100.

Thorn, Double Pink. Double pink or rose flowers with white tips.
Wholesale Price for first class Trees, 4 to 5 feet, $1.50 each.

Thorn, Paul’s Double Scarlet. Flowers deep crimson with scarlet shade; very double.
Wholesale Price of Trees, 4 to 5 feet, $1.50 each.

Willow Babylonica. Our common well-known weeping variety; forms a large round-headed, graceful tree; requires plenty of room, and where space can be spared, is quite desirable.
Wholesale Price, 7 to 8 feet, 75 cents each.
NUT TREES

English Walnuts are regular bearers, for the fruit buds are hardy and never injured by late frosts. Nut culture in the United States, is in its infancy. The English Walnut can be grown in the Northern and Eastern States, as well as in California and the South, for nuts grown here find a much more ready sale at advanced prices, as the flavor is decidedly better. The constant and growing demand for English Walnuts, and the immense quantities of them yearly imported to meet it, have given a great impetus to the planting.

So palatable and wholesome are the nut kernels, that they should become a staple article of food here as in Europe.

Until recently little attention has been given to the planting of English Walnuts, therefore, it may be truly said he who plants now, is bound to reap splendid returns. Most farms contain land that would pay better planted to English Walnuts, than anything else, for they will thrive on such land as is suitable for raising potatoes, corn and grain.

Every garden or lawn should also contain one or more of these trees for they are well shaped and provide splendid shade.

While we have a big supply of the 3-4 ft. trees, we anticipate a heavy demand, and would suggest you place your order early and thus avoid disappointment.

Chestnut, American Sweet is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes.

Wholesale Price of 4 to 5 ft. trees, $1.00 each.

Chestnut, Spanish. A handsome round-headed tree, producing abundantly, very large nuts that find a ready market at good prices.

Wholesale Price of Spanish Chestnut trees, 4 to 5 feet, $1.00 each.

Butternut. A fine native tree producing a large, longish nut, which is prized for its sweet, oily nutritious kernel.

Wholesale Price of Butternut trees, 4 to 5 feet, $1.00 each.

Pecans. This nut is very productive and delicious.

Wholesale Price, 3 to 4 feet, $1.00 each.

Walnut, English. A fine, lofty, growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. Every home garden should have one or more English Walnuts. Tree very hardy, will succeed well in all states east of the Mississippi.

Wholesale Price, 3 to 4 feet, $1.50 each.

Walnut, Black. The common well-known Black Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are liked by many.

Wholesale Price, 5 to 6 feet, 65 cents each.

Anne de Diesbach. Carmine, a beautiful shade; very large. A superior garden sort; fragrant; one of the hardiest.

Blanche Robert. Pure white, large and full, buds very beautiful. A strong grower and a desirable variety.

Bessie Brown. New. Very large, shell-shaped petals of creamy white, faintly flushed with pink, make up into flowers of rare beauty.

Baby Rambler. A dwarf (bush.) Just the thing for beds and borders and for edging walks. They are bound to take the place of geraniums and other plants which have to be removed each year. You can have them in Crimson and White.

Baron de Bonstetten. Flowers large and very double; color rich, dark red, passing to deep velvety maroon. Very fragrant.

Coquette des Alps. White, shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of blossoms for weeks after general varieties have finished.

Frau Karl Druschki. Snow Queen. The finest white Hybrid Perpetual Rose, with large, full flowers of splendid form. It is marvelous in its beauty in half opened bud and in the pure white of the full opened bloom. It is the ideal rose for cemetery planting both North and South. It holds its foliage well and is healthy and vigorous and in hardiness it equals any of the Hybrid Perpetuals.

41 Grove St., Irvington, N. J.
Nov. 7, 1921.

Dear Sirs:—I have received my order in the most proper condition and I am much satisfied with your trees and bushes.

Very truly yours,

AUGUST RUFFIO.

Maloney Hardy Roses Grown at an Elevation of 1500 Feet Are Incomparable
ROSES—Continued

General Jacqueminot. Brilliant crimson; large and fine. Beautiful in bud and a universal favorite.

Hugh Dickson. Intense crimson, shaded scarlet; very large, full and magnificent form, with high pointed center; growth upright and vigorous, free and continuous blooming; the finest of all autumn roses, highly perfumed.

Killarney. One of the most popular of our garden roses. It is perfectly hardy, a robust grower; color sparkling, brilliant, imperial pink.

La France. Rich satiny peach, changing to deep rose; large and full. A constant bloomer. The sweetest of all.

Magna Charta. Pink and carmine; very large and full; a profuse bloomer. Fragrant. Free grower.

Marshall P. Wilder. Bright cherry carmine; very fragrant and one of the freest bloomers; vigorous.

Mad. Caroline Testout. One of the most popular of the Hybrid Teas for the garden. This is the rose which has made Portland, Oregon, famous. The flowers are extra large, and a brilliant, shining pink.

**Rose Collection No. 31**

Maloney Hardy Roses Grown at an Elevation of 1500 Feet Are Incomparable
Mad. Plantier. Pure white, large and very double. A free bloomer and grower.

Mrs. Laing. Very free flowering; commences early and continues to bloom profusely until fall. Of delicate pink color. Very fragrant.

Margaret Dickson. New, perfectly hardy and very vigorous. A free summer and autumn bloomer. Flowers white with pale flesh center, of a waxy texture and delightful fragrance.

Perle des Jardines. A rich shade of yellow, fragrant—one of the best yellow roses, bush exceptionally hardy.

Prince Camile de Rohan. Very dark velvety crimson, changing to intense maroon.

Paul Neyron. The largest of all. Deep rose color. A free bloomer and vigorous grower.

**CLIMBING ROSES**

Wholesale price, 2 yr. No. 1 Bushes 65c each, $6.00 per 10.

Crimson Rambler. New. Of Japan origin. Very vigorous, growing eight to ten feet a season after it is well established. Entirely hardy and extremely prolific. It blooms in clusters. Of a beautiful crimson color and lasts a long time. It is a jewel.

Prairie Queen. Bright rosy red. Very large and fine.

Dorothy Perkins. A most beautiful shell-pink rambler. In hardiness, nothing more could be desired. Flowers are very double of large size, usually two inches across and borne in loose clusters.

---

**No Roses Imported**

The Government prohibits the importation of roses. About one-half of the roses sold in the U. S. were imported. Under these conditions it is advisable to order early this spring.
Maloney’s Stock Always Pleases

Croton-on Hudson, N. Y.
April 8, 1921.

Gentlemen: Just a line to let you know that I received the 100 Hedge plants that I ordered from you and have set them out. I surely am very much pleased with them for I don’t think I could have received any better if I had gone direct to your nursery and picked them out. Everyone going by remarks about the fine hedge plants and inquire as to where I obtained them and it is indeed a pleasure for me to recommend your stock.

Sincerely yours,
F. W. MURNIN.

Sharon, Pa., Oct. 31, 1921.

Gentlemen: I received your shipment on Oct. 26th and the trees were in fine condition. I am well pleased with them.

Yours truly,
F. L. McCracken.

Norwalk, Conn., Nov. 18, 1921.

Gentlemen:—My shipment arrived several days ago “on time” and in perfect condition. All planted. Thanks.

Yours truly,
HARRISON N. VEDDER.

Hyattsville, Md., Nov. 10, 1921.

Dear Sirs:—Shrubs and trees received all O. K. and everything is fine.

Yours truly,
MRS. H. G. BLOCK, 20 Sibley Ave.

Chicopee, Mass., Nov. 12, 1921.

Dear Sirs:—Your prompt and well packed shipment of fine trees and shrubs arrived this week in the best of condition. Many thanks, yours very truly,

JOHN H. HOLMES, Granby Road.

Visit Our Nurseries and Let Us Show You Our Scientific Business-Like Way of Growing Trees
Hardy Perennials and Bulbs

It is no wonder that these grand old fashioned hardy garden flowers continue to increase in popularity because there is not a time during the whole flowering season in which some are not in blossom, and when the wooded shrubs are almost bare of flowers in July and August, these perennials and bulbs may be depended upon to make a grand display, requiring scarcely any attention.

A few beds of Iris, Lillies, Phlox, Gladiolus, Dahlias and Cannas are an important adjunct to the home and its enjoyment.

The planting of perennials and bulbs has received a wonderful impetus during the past few years—it does seem good as you drive through cities, towns, rural districts to note the revival of these delightful color effects so common to the gardens of long ago.

PHLOX

Europa. One of the newer varieties. White with pink eye. Large and a good grower. 25c each, $2.50 per doz.

Eclaireur. Flowers large, bright purple-carmine with lighter center; of fine form. 25c each, $2.50 per dozen.

W. C. Egan. One of the most beautiful of all—a delicate lilac-pink. 25c each, $2.50 per doz.

Frau Anton Buchner. Considered the finest white phlox to date. 25c each, $2.50 per dozen.

Goliath. A new distinct variety of attractive appearance. It is of gigantic growth, producing large trusses with flowers of a bright carmine color, with a dark carmine-red center. A decided acquisition, and flowering very early. 25c each, $2.50 per doz.

GLADIOLI

Lily Lehman. An early, almost white variety of large size and beautiful form. 25c each, $2.50 per doz.

War. A new blood red variety. Extra fine. 25c each, $2.50 per dozen.

Panama. An improved “America” with flowers of a deeper shade of pink and much larger. 25c each, $2.50 per doz.
DAHLIAS

Mme. Victor Vassier. An extra fine sulphur-yellow; one of the best. 25c each; $2.50 per dozen.

LeGrande Manitou. Largest and best fancy decorative Dahlia grown; pure white, striped and splashed with violet-purple. 25c each; $2.50 per dozen.

Delice. A splendid variety and very generally grown. It is a bright pink, of perfect form and largely grown for cut flowers. 25c each; $2.50 per dozen.

Souv. de Gustav Doazon. A flower frequently measuring 8 inches in diameter, of a bright orange-red color; always reliable and grown in immense quantities. 25c each; $2.50 per dozen.

CANNAS

King Humbert. 4 ft. The finest canna grown very broad-leaved foliage, of a rich, reddish bronze color. Flowers orange scarlet, very large. Very free bloomer. 25c each; $2.50 per doz.

Indiana. 6 ft. Dark green foliage with glistening golden orange blossoms. Six inches or more in diameter. Orchid flowering type. 25c each; $2.50 per doz.

Pennsylvania. 6 ft. Green foliage, deep orange scarlet flowers; very large, often 7 inches across. 25c each; $2.50 per doz.

Wyoming. 6 ft. Similar to Indiana in bloom but with foliage a purplish cast; has the same large fine flowers. 25c each; $2.50 per doz.

Greenback. 7 ft. An enormous plant of foliage type. Broad rounded leaves resembling a banana plant. Does not bloom, but is a dandy for the tall plants for the center of a bed or a back border. 25c each; $2.50 per doz.
IRIS

Blue Sky. Medium size. Standards delicate, bluish lavender, forming a contrast to the purple falls. 25c each, $2.50 per doz.

Chameleon. Medium size, slightly fragrant. Deep lavender standards, violet-purple falls. 25c each, $2.50 per doz.

Charlotte Patty. Standards a golden yellow; falls lightly feathered and veined with maroon. 25c each, $2.50 per doz.

Fairy Queen. Dwarf; late flowering variety. White, falls veined with blue. 25c each, $2.50 per doz.

Garrick. Orchid type of flower, with opal lights in the sun. Standards pale mauve; falls a light violet. 25c each, $2.50 per doz.

General Aganemon. Pure white standards, falls tinted and veined with "Pansy Violet." 25c each, $2.50 per doz.

Leopold. Darkest of the yellow types. Standards bronze yellow, falls are heavily veined with a dark, reddish maroon. 25c each, $2.50 per doz.

Lilacinia. The coloring is most delicate; white standards are lightly traced, tipped with lavender; white falls have a dark bar at their base radiating into violet lines. 25c each, $2.50 per doz.

Madame de Bonne. Large and attractive. Standards and falls are a clear, amber yellow. 25c each, $2.50 per doz.

NOTE: We are one of the few Nurserymen in the United States who prepay transportation and charge no more for our stock.

PEONIES

Avalanche. Late, pure white with delicate pencilings of carmine. 50c each, $5.00 per dozen.

Courrone D'Or. White with a blotch of red in the center around which is a halo of yellow. Immense, ball-shaped bloom. 50c each, $5.00 per doz.

Delicatissima. Color is dainty lilac-rose. The large double blooms are freely produced on tall strong stems; fragrant. 50c each, $5.00 per doz.

Felix Crousse. A leading red peony. An exceptionally striking kind, with large, double, ball-shaped blooms. Extra fine in every way. 50c each, $5.00 per dozen.

Festiva Maxima. For over fifty years this has been the standard for perfection in peonies. The immense, perfectly double flowers are pure snow-white, with a beautiful flake of carmine in the center. 50c each, $5.00 per dozen.

Grandiflora. Bright sea-shell pink; overlaid with delicate lilac and salmon pink—an enchanting color. 50c each, $5.00 per doz.

Mad. Lebon. Valuable late red. Flowers ball-shape, very rich, cherry-rose. 50c each, $5.00 per doz.
Evergreens

EVERGREENS are increasing in popularity rapidly. We are now giving special attention to the propagation and culture of perfectly hardy species and varieties, such as are most useful to the general planter.

We recommend Spring planting. All evergreens will be lifted with ball of earth and roots wrapped in burlap.

American Arbor Vitae. A beautiful native tree much used for hedges, screens, singly on lawn and in tubs for porches. It is a handsome little tree and if allowed to grow natural, will be quite tall and pyramid shape. Can be trimmed and kept in any form or height. In the summer is bright green above and yellow below, and when winter comes, changes to the richest tone of brown and bronze.

Wholesale Price, 2 to 3 feet, $1.00 each, $9.00 per ten. Balled and Burlapped.

Colorado Blue Spruce. Foliage is blue and sage—that distinctive color which is so rare in the east. The blue Spruce is the most beautiful of conifers. Its silver foliage glistening in the sunlight, makes it surpass in beauty any other evergreen.

Wholesale price, 2 to 3 feet, $3.00 each. Balled and Burlapped.

Norway Spruce. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed with great beauty at all seasons of the year, but particularly in winter when its branches are weighed down with newly fallen snow. This spruce is a rapid grower and is often used as a lawn fence between village or city lots. Norway Spruce can be planted most effectively in groups on the lawn, imitating nature, planting without any particular order.

Wholesale Price, largest size, 2 to 3 ft., $1.00 each; $9.00 per ten; $85.00 per hundred. Balled and Burlapped.

Irish Juniper. Junipers are handsome evergreen, always neat and clean. This variety grows exceptionally slim and commonlike. A general favorite for cemeteries and other planting.

Wholesale Price, 2-3 ft. $1.25 each, $10.00 per ten. Balled and Burlapped.

Collection of Evergreens as Shown in Illustration Below

18 Worth $23.50 for $20.00
6 American Arbor Vitae, 6 Norway Spruce 4 Irish Juniper, 2 Colorado Blue Spruce

This illustrates the fine effect of evergreen planting
Hedge Plants

California Privet. A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge-plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up, many strong shoots. The leaves are a rich green and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter. Set one foot apart in double rows or 20 to each 10 ft. Plant alternately—rows one foot apart.

Privet, Amurense (North)—The best for hedge in the North, has stood twenty degrees below zero, upright growth, foliage similar in appearance to California Privet. Barberry Thumbergii. A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall. Strong plants, 2 to 3 feet, well branched, $4.50 per 10, $40.00 per 100.

Norway Spruce. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed with great beauty at all seasons of the year, but particularly in winter when its branches are weighed down with newly fallen snow. This spruce is a rapid grower and is often used as a lawn fence between village or city lots. Norway Spruce can be planted most effectively in groups on the lawn, imitating nature, planted without any particular order, but far enough apart to give each tree an opportunity to expand itself in its beauty.

Hardy Flowering Shrubs

Shrubs are useful in bringing out the full beauty of a house. Splendid effects can be had by planting an assortment of flowering shrubs on the lawn, not at all difficult to arrange for a group planted promiscuously here and there, has a splendid effect.

Maloney shrubs are hardy, upland grown at an elevation of 1500 feet; varieties listed are the hardiest, most beautiful and lasting, thrive everywhere and need little care or attention when once established. Year after year they grow larger and more beautiful.

Some shrubbery needs more pruning than others. They should all be trimmed enough to keep them shapely.

Hydrangea should be cut back every spring one-half of the last year's growth. The altheas can be pruned to suit your own fancy. Nearly all shrubbery grows gracefully, but sometimes a slight pruning will be necessary to make them shapely. The Gold-leaf Syringa, like some other shrubs, can be pruned to any shape desired, like the evergreens.

Althea. A large shrub, sometimes trimmed into tree form, that blooms freely in August or September, when almost every tree is out of bloom. Vigorous grower and succeeds everywhere. Also called Rose of Sharon. We can furnish double varieties in these colors: Althea Double Purple, Red, Pink and White.

Butterfly Bush. Seems to attract butterflies in large numbers. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is often ten inches long. It blossoms from early summer till frost; splendid for cutting.

Barberry Thumbergii. A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall. All Barberries make very fine hedges.

Calycanthus. (Sweet-scented shrub.) The wood is fragrant; foliage rich; flowers are of chocolate color, having a peculiarly agreeable odor.

Deutzia, Gracilis. Pure white flowers in June. Two feet high when fully grown.

Deutzia, Crenata, Double-Flowering. A hardy, vigorous shrub that does not suffer from insects or diseases and early in the season is fairly covered with very showy double white flowers that on the edge are slightly tinged with rose. Handsome, desirable shrub.

Deutzia, Lemoinei. Dwarf, the flowers are large pure white and produce freely.

Deutzia, Pride of Rochester. Blooms in May. Double, white, tinted with rose on the edge.

Fringe Purple or Smoke Tree. A very elegant and ornamental large shrub, with curious, hair-like flowers of a pinkish brown color which sometimes literally cover the tree and remain all summer.

Maloneys Grow the Trees and Plants They Sell
One May Live as Long Without Shrubs and Ornamentals. But—Not so Happily

Conditions will be favorable this spring for doing that planting of shrubs and ornaments which you possibly planned last spring and postponed on account of labor shortage.

A modern home costs considerable money, much of the expense being incurred for the sake of beautifying and it is money well spent for Americans like beautiful surroundings. A large portion of the expenditure on a house is devoted to ornamentation; a fireplace here, a moulding there, a higher polish everywhere. These are the things that ennoble life, that give a sparkle to the eye and conduce to real comfort and satisfaction.

And yet many people who spare neither time nor money on the finish of the house are utterly indifferent about the appearance of their lawn, never thinking that a small investment will make a living picture of their home. To fully realize, appreciate and enjoy ornamental planting just compare two homes of similar conditions, one having the bare lawn, the other with a few shrubs, roses and ornaments promiscuously planted. And let us advise you that these plantings can be made with the small expenditure of one or two per cent of the cost of building your home. Furthermore the perfume from the shrubs, ornamentals and roses is stated by physicians of authority to be of great improvement to the healthful condition about your home.

Randolph, Mass., Nov. 4, 1921.

Dears Sirs:—I received the trees and shrubs in first class condition and will be glad to send for more next Spring.

Very truly yours
HENRY DeCLASSANT.

We Prepay Transportation Charges. See Page 9
**SHRUBS—Continued**

**Fringe White.** A popular and much admired shrub of moderate growth, and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white fringe-like flowers.

**Forsythia Fortunii** (Golden Bells.) Deep yellow flowers in great profusion in April.

**Golden-Leaved Elder.** The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold.

**Hydrangea Paniculata Grandiflora.** Absolutely hardy; thrives in all soils; grows rapidly and blossoms profusely. The flowers are pure white, afterward changing to pink, and are borne in large pyramidal trusses often more than a foot long and six to eight inches in diameter. Begins to bloom early in August, and continues to bloom for several weeks. Wherever known it is considered to be one of the finest flowering shrubs. Wholesale Price 75c each.

**Hydrangea Arborescens Grandiflora Alba** (Hills of Snow)—This hardy American shrub is the very finest addition to this class of plants. The blooms are of the very largest size, of pure snow-white color, and the foliage is finely finished.

**Lilac, Purple.** An old favorite; purple flowers.

**Lilac, White.** A well known favorite.

**Mock Orange.** Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower.

**Quince, Japan.** Dark green foliage, and showy deep, scarlet flowers of good size.

**Spiraea, Prunifolia.** Blooms early, and is very effective with its long gracefully curving branches covered their whole length with small, double white flowers.

**Spiraea, Anthony Waterer.** A dwarf variety of great beauty. It's broad flat heads of red flowers continue in perfection all summer.

**Spiraea, Billardi.** A hardy, free growing shrub. During July every branch and twig is tipped with a spike of beautiful blood-red flowers 4 to 6 inches in length. A distinctive and beautiful flower and shrub.

**Spiraea Callosa Rosea.** Has large panicles of deep rosy blossoms; grows freely and blooms nearly all summer; fine.

**Spiraea Douglae.** Has spikes of beautiful, deep rose-colored flowers in July and Aug.

**Spiraea Van Houttei.** This is undoubtedly the best of the spiraeas. The illustration on Page 61 shows it in free bloom. The blossoms are white. Do not pass it by.

**Syringa, Common.** Large, white flowers; very hardy.

**Syringa, Golden.** Large, deep yellow flowers; bush hardy.

---

**Maloney’s Flowering Shrub Collection No. 16 FOR THE HOME GROUNDS**

6 Shrubs worth $3.00 for $2.50

1 Barberry Thumbergii
1 Deutzia, Pride of Rochester
1 Butterfly Bush
1 Spiraea Van Houttei
1 Deutzia Crenata
1 Althea Red

Grantsville, Kansas, Nov. 10, 1921.

Gentlemen:—Shrubs reached me in perfect condition. I have never seen more perfect specimen stock and will result in more orders not only from me but others for Spring delivery.

Yours truly,

JAMES R. HAYNES.
SHRUBS—Continued

Japan Snowball  
Butterfly Bush

The Reason Why

There is no way that a real estate owner can add more to the value of his home or property than by setting out roses, shrubbery and flowering plants. A well planted lawn bespeaks refinement and taste, even in a greater degree than the furnishings inside the house. If the lawn or yard is well planted it adds to the comfort of the home, and here is the point of chief interest—you can usually judge the character of the people inside the house by the way the outside looks. A cottage may be ever so humble, but if it is adorned with vines, shrubs and roses, you at once know that good hearts beat within the breast of the occupants. Then again, everyone in a community is benefited by the ornamentation of the surroundings of the home. It furnishes an object lesson that others will follow, and in this way serves a useful purpose in stimulating a love of nature.
SNOWBALL COMMON

Snowball, Japan. Erect, compact, growing 6 to 8 feet, with purple tinted corrugated foliage; a solid mass of white in June.

Upright Honey Suckle (pink.) Pink flowers which contrast beautifully with the foliage.

Weigela, Candida. The flowers are of the purest white, blooming in June, and all summer. Hardy.

Weigela Eva Rathke. Showy, bright red flowers borne freely during the summer.

WEIGELA ROSEA

Weigela, Floribunda. The flowers are dark crimson, with white stamens somewhat like Fuchsia flowers. It blooms in the spring and in the fall.

Weigela Rosea. This is one of the most charming shrubs in cultivation; it cannot be too highly recommended; the flowers are large and of deep rosy color, and are borne in great profusion.

Hydrangea Tree Form

Same as Hydrangea P. G. except in tree form, being grafted on a Hydrangea stalk about 3 ft. high. When in full bloom are very attractive $1.00 each.

Our Shrub Collection No. 14 for $8.50

(See Illustration Below)

3 Spiraea Van Houttei
3 Butterfly Bush
3 Deutzia Crenata
3 Barberry Thunbergii
3 Spiraea Billardi
5 Althea Red
Hardy Climbing Vines

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

Ampelopsis Veitchi (Boston Ivy.) This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it closely with overlapping foliage, giving it the appearance of being shingled with green leaves.
Wholesale price of strong 2 year plants, 65 cents each.

American Ivy or Virginia Creeper (A. Quinquefolia). A native vine of rapid growth, with large luxuriant foliage, which in autumn assumes the most gorgeous crimson and purple coloring.
Wholesale price of strong 2 year plants, 65 cents each.

Dutchman’s Pipe. Brownish flowers, resembling a miniature pipe; splendid for archways and verandas.
Wholesale price of strong 2 year plants, 65 cents each.

Haleana (Hall’s Japan Honeysuckle). An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white, changing to yellow.
Wholesale price of strong 2 year plants, 65 cents each.

Henryii Clematis. A vigorous grower and a free bloomer, producing its large pure white flowers constantly during the summer and early autumn. The best flowered variety.
Wholesale price of strong 2 year plants, 65 cents each.

Jackmanni Clematis. The flowers are large, intense, rich, velvety violet-purple, and are produced in such masses as to form a cloud of bloom. This is the best known Clematis, and should have credit of the great popularity now attending this family of beautiful climbers.
Wholesale price of strong 2 year plants, 65 cents each.

Paniculata Clematis (Sweet-scented Japan Clematis). Of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy foliage. The flowers are of medium size, fragrant, pure white, borne in immense sheets in September, when very few other vines are in bloom.
Wholesale price of strong 2 year plants, 65 cents each.

Trumpet Vine. A robust, woody vine; twining tightly with numerous roots along its stems. Its orange scarlet trumpet-shaped flowers cluster at the tip of the branches.
Wholesale price of strong 2 year plants, 65 cents each.

Wisteria, Chinese Purple. A most beautiful climber of rapid growth and producing long pendulous clusters of pale blue flowers.
Wholesale price of strong 2 year plants, $1.00 each.

PARCEL POST. Climbing Vines can be sent by parcel post, postage prepaid, for 5 cents per vine extra.
We strive to avoid mistakes, but in the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthness to name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, productiveness or any other matter.

*We Cut our Scions for Budding from Fruiting Trees* (OVER)
OUR OFFICE

BEFORE PLANTING

Dear Friends,—Have you not frequently remarked about the beauty of some home while driving through a city, town or country? Has it ever occurred to you just what there was in particular about those places which appealed to your sense of beauty? Was it not due largely to the splendid effect of a few shrubs and ornamental trees promiscuously planted?

Is it not true that a home, no matter how well built, if standing on a bare lot never causes a favorable comment? It's the few dollars invested in shrubs that gives warmth to the house and greatly increases its value. Note the illustrations on this page.

A slight investment in shrubs, roses and ornamental trees will add greater value, comfort and solid satisfaction to your home than dollar for dollar invested in anything else.

AFTER PLANTING
